## Author Index

Ahmed, S.
— and Moffat, J.B.
Reactant composition and concentration effects in the oxidation of methane on supported 12-molybdophosphoric acid (4)101
Al-Ubaid, A.
— and Wolf, E.E.
Steam reforming of methane on reduced non-stoichiometric nickel aluminate catalysts (40)73
Ambach, E., see Doppler, G. (4)119
Andreev, A., see Mihajlova, A. (4)247
Arai, H., see Ishihara, T. (4)87
Ayo, D.B.
— and Susu, A.A.
Platinum–rhenium/alumina catalyst. III. Mechanism of $C_6$-ring hydrogenation/dehydrogenation reactions (40)1
Baranski, A.
—, Reizer, A., Kotarba, A. and Pyrczak, E.
Simultaneous effect of phase composition and water vapour on the reduction of iron catalyst for ammonia synthesis (40)67
Bergeret, G.
—, Gallezot, P., Chary, K.V.R., Rama Rao, B. and Subrahmanyam, V.S.
Structure of monolayer type vanadium pentoxide, supported on $\gamma$-alumina (40)191
Berry, F.J.
—, Gogarty, P.M. and Jenkins, J.W.
Reduction of titanium–antimony oxides in hydrogen and in carbon monoxide (40)151
Boer, M. de, see Vogt, E.T.C. (40)254
Borovkov, V.Yu., see Kazansky, V.B. (40)17
Bryan, S.J.
—, Jennings, J.R., Kipling, S.J., Owen, G., Lambert, R.M. and Nix, R.M.
Activation and performance of methanol synthesis catalysts derived from glassy copper/rare earth alloys (40)173
Bussière, P., see Lox, E.S. (40)197
Chary, K.V.R., see Bergeret, G. (40)191
Chren, S-L., see Huang, T.-J. (40)43

## Subject Index

Adsoption
Supported iron–cobalt–nickel ternary alloy catalysts for the hydrogenation of carbon monoxide (40)87

Activation
Simultaneous effect of phase composition and water vapour on the reduction of iron catalyst for ammonia synthesis (40)67

Adsorption
Diffusion of alkanes in molecular sieves: evidence for confinement effect (40)L1

Adsorption
Kinetics of partial oxidation of methanol over a copper–zinc catalyst (40)43

Ageing
Monitoring the surface states of a low-temperature carbon monoxide shift catalyst during operation (40)131

Ageing
Characterization of a promoted precipitated iron catalyst for Fischer–Tropsch synthesis (40)197

Aldol condensation
Aldol condensation of acetone/acetone $d_6$ over magnesium oxide and lanthanum oxide (40)183

Ammonia synthesis
Simultaneous effect of phase composition and water vapour on the reduction of iron catalyst for ammonia synthesis (40)67

Amorphous alloys
Activation and performance of methanol synthesis catalysts derived from glassy copper/rare earth alloys (40)173

Antimony oxides
Reduction of titanium–antimony oxides in hydrogen and in carbon monoxide (40)151

Benzene hydrogenation
Platinum–rhenium/alumina catalyst. III. Mechanism of $C_6$-ring hydrogenation/dehydrogenation reactions (40)1

Carbon monoxide conversion
Monitoring the surface states of a low-temperature carbon monoxide shift catalyst during operation (40)131

Carbon monoxide hydrogenation
Properties and product selectivities of iron ultrafine particles as a catalyst for liquid phase hydrogenation of carbon monoxide (40)53

Carbon monoxide hydrogenation
Supported iron–cobalt–nickel ternary alloy catalysts for the hydrogenation of carbon monoxide (40)87

Carbon monoxide oxidation
Reduction of titanium–antimony oxides in hydrogen and in carbon monoxide (40)151

Carbon monoxide oxidation
Preparation of highly loaded vanadium oxide–silica catalysts (40)254

Catalyst characterization
Infrared diffuse reflectance study of alkali promoted iron/alumina and cobalt/alumina Fischer–Tropsch catalysts prepared by decomposition of carbonyls (40)17

Catalyst characterization
Oscillations in the non-steady state oxidation of carbon monoxide over supported monometallic palladium, cerium and cobalt and bimetallic palladium–cerium and palladium–cobalt catalysts (40)27

Catalyst characterization
Steam reforming of methane on reduced non-stoichiometric nickel aluminate catalysts (40)73

Catalyst characterization
Reactant composition and concentration effects in the oxidation of methane on supported 12-molybdophosphoric acid (40)101

Catalyst characterization
Physical and catalytic properties of high-temperature water-gas shift catalysts based upon iron–chromium oxides (40)119

Catalyst characterization
Monitoring the surface states of a low-temperature carbon monoxide shift catalyst during operation (40)131

Catalyst characterization
Reduction of titanium–antimony oxides in

hydrogen and in carbon monoxide (40)151
Catalyst characterization
Studies of molybdena-alumina catalysts. XIV. Effect of cation-modified aluminas (40)157
Catalyst characterization
Activation and performance of methanol synthesis catalysts derived from glassy copper/rare earth alloys (40)173
Catalyst characterization
Aldol condensation of acetone/acetone $d_6$ over magnesium oxide and lanthanum oxide (40)183
Catalyst characterization
Structure of monolayer type vanadium pentoxide supported on $\gamma$-alumina (40)191
Catalyst characterization
Characterization of a promoted precipitated iron catalyst for Fischer-Tropsch synthesis (40)197
Catalyst characterization
Preparation of highly loaded vanadium oxide-silica catalysts (40)254
Catalyst characterization
Influence of soluble aluminium on the state and surface properties of platinum in a series of reduced platinum/alumina catalysts (40)291
Catalyst preparation
New preparation technique for a highly dispersed nickel-alumina catalyst and its application to liquid phase hydrogenation (40)139
Catalyst preparation
Activation and performance of methanol synthesis catalysts derived from glassy copper/rarte earth alloys (40)173
Catalyst preparation
Preparation of highly loaded vanadium oxide-silica catalysts (40)254
Catalyst preparation
Propene oligomerization over synthetic mica-montmorillonite (SMM) and SMM incorporating nickel, zinc and cobalt (40)277
Cation modification
Studies of molybdena-alumina catalysts. XIV. Effect of cation-modified aluminas (40)157
Cerium
Oscillations in the non-steady state oxidation of carbon monoxide over supported monometallic palladium, cerium and cobalt and bimetallic palladium-cerium and palladium-cobalt catalysts (40)27
Cobalt
Oscillations in the non-steady state oxidation of carbon monoxide over supported monometallic palladium, cerium and cobalt and bimetallic palladium-cerium and palladium-cobalt catalysts (40)27
Cobalt
Propene oligomerization over synthetic mica-montmorillonite (SMM) and SMM incorporating nickel, zinc and cobalt (40)277
Cobalt/alumina
Infrared diffuse reflectance study of alkali promoted iron/alumina and cobalt/alumina Fischer-Tropsch catalysts prepared by decomposition of carbonyls (40)17
Coke formation
Activity and stability of nickel-copper-/silica catalysts prepared by deposition-precipitation (40)219
Coke formation
Propene oligomerization over synthetic mica-montmorillonite (SMM) and SMM incorporating nickel, zinc and cobalt (40)277
Computer graphics
Diffusion of alkanes in molecular sieves: evidence for confinement effect (40)L1
Copper-zinc
Kinetics of partial oxidation of methanol over a copper-zinc catalyst (40)43
Copper/rare earth alloys
Activation and performance of methanol synthesis catalysts derived from glassy copper/rare earth alloys (40)173
Cyclohexane dehydrogenation
Platinum-rhenium/alumina catalyst. III. Mechanism of $C_6$-ring hydrogenation/dehydrogenation reactions (40)1
Cyclohexene hydrogenation/dehydrogenation
Platinum-rhenium/alumina catalyst. III. Mechanism of $C_6$-ring hydrogenation/dehydrogenation reactions (40)1

Deposition-precipitation

Activity and stability of nickel-copper-/silica catalysts prepared by deposition-precipitation (40)219
Dehydrogenation
Effect of the precursor properties on the selectivity of iron based catalysts in the dehydrogenation of ethylbenzene to styrene (40)247
Diffuse reflectance infrared
Infrared diffuse reflectance study of alkali promoted iron/alumina and cobalt/alumina Fischer-Tropsch catalysts prepared by decomposition of carbonyls (40)17
Diffusion
Diffusion of alkanes in molecular sieves: evidence for confinement effect (40)L1

Ethylbenzene dehydrogenation
Effect of the precursor properties on the selectivity of iron based catalysts in the dehydrogenation of ethylbenzene to styrene (40)247

Filamentary carbon
Activity and stability of nickel-copper-/silica catalysts prepared by deposition-precipitation (40)219
Fischer-Tropsch synthesis
Infrared diffuse reflectance study of alkali promoted iron/alumina and cobalt/alumina Fischer-Tropsch catalysts prepared by decomposition of carbonyls (40)17
Fischer-Tropsch synthesis
Properties and product selectivities of iron ultrafine particles as a catalyst for liquid phase hydrogenation of carbon monoxide (40)53
Fischer-Tropsch synthesis
Characterization of a promoted precipitated iron catalyst for Fischer-Tropsch synthesis (40)197

Glassy alloys
Activation and performance of methanol synthesis catalysts derived from glassy copper/rare earth alloys (40)173

Hexene hydrogenation
Studies of molybdena-alumina catalysts. XIV. Effect of cation-modified aluminas (40)157
Hydrocarbon oxidation
Reduction of titanium-antimony oxides in hydrogen and in carbon monoxide (40)151
Hydrogen oxidation
Reduction of titanium-antimony oxides in hydrogen and in carbon monoxide (40)151
Hydrogenation
New preparation technique for a highly dispersed nickel-alumina catalyst and its application to liquid phase hydrogenation (40)139

Ion-exchange
Propene oligomerization over synthetic mica-montmorillonite (SMM) and SMM incorporating nickel, zinc and cobalt (40)277
Iron
Properties and product selectivities of iron ultrafine particles as a catalyst for liquid phase hydrogenation of carbon monoxide (40)53
Iron
Simultaneous effect of phase composition and water vapour on the reduction of iron catalyst for ammonia synthesis (40)67
Iron
Characterization of a promoted precipitated iron catalyst for Fischer-Tropsch synthesis (40)197
Iron oxide
Effect of the precursor properties on the selectivity of iron based catalysts in the dehydrogenation of ethylbenzene to styrene (40)247
Iron-chromium oxides
Physical and catalytic properties of high-temperature water-gas shift catalysts based upon iron-chromium oxides (40)119
Iron-cobalt-nickel
Supported iron-cobalt-nickel ternary alloy catalysts for the hydrogenation of carbon monoxide (40)87
Iron/alumina
Infrared diffuse reflectance study of alkali promoted iron/alumina and cobalt/alumina Fischer-Tropsch catalysts prepared by decomposition of carbonyls (40)17

Isotope effect
Aldol condensation of acetone/acetone $d_6$ over magnesium oxide and lanthanum oxide (40)183

Kinetics
Platinum–rhenium/alumina catalyst. III. Mechanism of $C_6$-ring hydrogenation/dehydrogenation reactions (40)1
Kinetics
Kinetics of partial oxidation of methanol over a copper–zinc catalyst (40)43
Kinetics
Simultaneous effect of phase composition and water vapour on the reduction of iron catalyst for ammonia synthesis (40)67
Kinetics
Reactant composition and concentration effects in the oxidation of methane on supported 12-molybdophosphoric acid (40)101
Kinetics
Preparation of highly loaded vanadium oxide–silica catalysts (40)254

Lanthanum oxide
Aldol condensation of acetone/acetone $d_6$ over magnesium oxide and lanthanum oxide (40)183
Liquid phase hydrogenation
Properties and product selectivities of iron ultrafine particles as a catalyst for liquid phase hydrogenation of carbon monoxide (40)53
Liquid phase hydrogenation
New preparation technique for a highly dispersed nickel–alumina catalyst and its application to liquid phase hydrogenation (40)139

Magnesium oxide
Aldol condensation of acetone/acetone $d_6$ over magnesium oxide and lanthanum oxide (40)183
Methanation
Activity and stability of nickel–copper–/silica catalysts prepared by deposition–precipitation (40)219
Methane oxidation
Reactant composition and concentration effects in the oxidation of methane on supported 12-molybdophosphoric acid (40)101
Methane reforming
Steam reforming of methane on reduced non-stoichiometric nickel aluminate catalysts (40)73
Methanol partial oxidation
Kinetics of partial oxidation of methanol overt a copper–zinc catalyst (40)43
Methanol synthesis
Activation and performance of methanol synthesis catalysts derived from glassy copper/rare earth alloys (40)173
Methylcyclopentane conversion
Influence of soluble aluminium on the state and surface properties of platinum in a series of reduced platinum/alumina catalysts (40)291
Mica–montmorillonite
Propene oligomerization over synthetic mica–montmorillonite (SMM) and SMM incorporating nickel, zinc and cobalt (40)277
Molecular sieves
Diffusion of alkanes in molecular sieves: evidence for confinement effect (40)L1
Molybdena–alumina
Studies of molybdena–alumina catalysts. XIV. Effect of cation-modified aluminas (40)157
Molybdophosphoric acid
Reactant composition and concentration effects in the oxidation of methane on supported 12-molybdophosphoric acid (40)101
Monolayer structure
Structure of monolayer type vanadium pentoxide supported on $\gamma$-alumina (40)191

Nickel
Propene oligomerization over synthetic mica–montmorillonite (SMM) and SMM incorporating nickel, zinc and cobalt (40)277
Nickel aluminate
Steam reforming of methane on reduced non-stoichiometric nickel aluminate catalysts (40)73
Nickel–alumina
New preparation technique for a highly

dispersed nickel-alumina catalyst and its application to liquid phase hydrogenation (40)139

Nickel-copper/silica
Activity and stability of nickel-copper-/silica catalysts prepared by deposition-precipitation (40)219

Oscillations
Oscillations in the non-steady state oxidation of carbon monoxide over supported monometallic palladium, cerium and cobalt and bimetallic palladium-cerium and palladium-cobalt catalysts (40)27

Palladium
Oscillations in the non-steady state oxidation of carbon monoxide over supported monometallic palladium, cerium and cobalt and bimetallic palladium-cerium and palladium-cobalt catalysts (40)27

Palladium-cerium
Oscillations in the non-steady state oxidation of carbon monoxide over supported monometallic palladium, cerium and cobalt and bimetallic palladium-cerium and palladium-cobalt catalysts (40)27

Palladium-cobalt
Oscillations in the non-steady state oxidation of carbon monoxide over supported monometallic palladium, cerium and cobalt and bimetallic palladium-cerium and palladium-cobalt catalysts (40)27

Particle size
Physical and catalytic properties of high-temperature water-gas shift catalysts based upon iron-chromium oxides (40)119

Particle size
Monitoring the surface states of a low-temperature carbon monoxide shift catalyst during operation (40)131

Particle size
New preparation technique for a highly dispersed nickel-alumina catalyst and its application to liquid phase hydrogenation (40)139

Platinum-rhenium/alumina
Platinum-rhenium/alumina catalyst. III. Mechanism of $C_6$-ring hydrogenation/dehydrogenation reactions (40)1

Platinum/alumina
Influence of soluble aluminium on the state and surface properties of platinum in a series of reduced platinum/alumina catalysts (40)291

Propene oligomerization
Propene oligomerization over synthetic mica-montmorillonite (SMM) and SMM incorporating nickel, zinc and cobalt (40)277

Selectivity
Supported iron-cobalt-nickel ternary alloy catalysts for the hydrogenation of carbon monoxide (40)87

Selectivity
New preparation technique for a highly dispersed nickel-alumina catalyst and its application to liquid phase hydrogenation (40)139

Selectivity
Effect of the precursor properties on the selecetivity of iron based catalysts in the dehydrogenation of ethylbenzene to styrene (40)247

Selectivity
Propene oligomerization over synthetic mica-montmorillonite (SMM) and SMM incorporating nickel, zinc and cobalt (40)277

Soluble aluminium
Influence of soluble aluminium on the state and surface properties of platinum in a series of reduced platinum/alumina catalysts (40)291

Steam reforming
Steam reforming of methane on reduced non-stoichiometric nickel aluminate catalysts (40)73

Styrene
Effect of the precursor properties on the selectivity of iron based catalysts in the dehydrogenation of ethylbenzene to styrene (40)247

Syngas conversion
Characterization of a promoted precipitated iron catalyst for Fischer-Tropsch synthesis (40)197

Thiophene hydrodesulfurization
Studies of molybdena-alumina catalysts.

XIV. Effect of cation-modified aluminas (40)157
Titanium-antimony oxides
Reduction of titanium-antimony oxides in hydrogen and in carbon monoxide (40)151
Topochemistry
Simultaneous effect of phase composition and water vapour on the reduction of iron catalyst for ammonia synthesis (40)67

Ultrafine particles
Properties and product selectivities of iron ultrafine particles as a catalyst for liquid phase hydrogenation of carbon monoxide (40)53

Vanadium oxide-silica
Preparation of highly loaded vanadium oxide-silica catalysts (40)254
Vanadium pentoxide/alumina
Structure of monolayer type vanadium pentoxide supported on $\gamma$-alumina (40)191

Water vapour
Simultaneous effect of phase composition and water vapour on the reduction of iron catalyst for ammonia synthesis (40)67
Water-gas shift reaction
Physical and catalytic properties of high-temperature water-gas shift catalysts based upon iron-chromium oxides (40)119

Zeolites
Diffusion of alkanes in molecular sieves: evidence for confinement effect (40)L1
Zinc
Propene oligomerization over synthetic mica-montmorillonite (SMM) and SMM incorporating nickel, zinc and cobalt (40)277

# applied catalysis

AN INTERNATIONAL JOURNAL DEVOTED TO CATALYTIC SCIENCE AND ITS APPLICATIONS

**VOL. 40, NOS. 1–2** **CONTENTS** **JUNE 15, 1988**

*(Abstracts/Contents Lists published in API Abstracts/Catalysts & Catalysis, Chemical Abstracts, Current Contents/Physical, Chemical & Earth Sciences, Current Contents/Engineering, Technology & Applied Sciences, Engineering Index, Metals Abstracts, Science Citation Index, Theoretical Chemical Engineering Abstracts, Automatic Subject Citation Alert and SCISEARCH)*

*Applied Catalysis Letters*

Diffusion of alkanes in molecular sieves: evidence for confinement effect
E.G. Derouane, J.B. Nagy, C. Fernandez, Z. Gabelica, E. Laurent and P. Maljean (Namur, Belgium) ..... L1

Platinum–rhenium/alumina catalyst. III. Mechanism of $C_6$-ring hydrogenation/dehydrogenation reactions
D.B. Ayo and A.A. Susu (Lagos, Nigeria) ..... 1

Infrared diffuse reflectance study of alkali promoted iron/alumina and cobalt/alumina Fischer–Tropsch catalysts prepared by decomposition of carbonyls
V.B. Kazansky, A.V. Zaitsev, V.Yu. Borovkov and A.L. Lapidus (Moscow, U.S.S.R.) ..... 17

Oscillations in the non-steady state oxidation of carbon monoxide over supported monometallic palladium, cerium and cobalt and bimetallic palladium–cerium and palladium–cobalt catalysts
L.A. Petrov and K.K. Tenchev (Sofia, Bulgaria), G.V. Speranskaya, G.A. Savelieva and N.M. Popova (Alma Ata, U.S.S.R.) and D.M. Shopov (Sofia, Bulgaria) ..... 27

Kinetics of partial oxidation of methanol over a copper–zinc catalyst
T.-J. Huang and S.-L. Chren (Hsinchu, Republic of China) ..... 43

Properties and product selectivities of iron ultrafine particles as a catalyst for liquid phase hydrogenation of carbon monoxide
H. Itoh, H. Hosaka, T. Ono and E. Kikuchi (Tokyo, Japan) ..... 54

Simultaneous effect of phase composition and water vapour on the reduction of iron catalyst for ammonia synthesis
A. Barański, A. Reizer, A. Kotarba and E. Pyrczak (Cracow, Poland) ..... 67

Steam reforming of methane on reduced non-stoichiometric nickel aluminate catalysts
A. Al-Ubaid and E.E. Wolf (Notre Dame, IN, U.S.A.) ..... 73

Supported iron–cobalt–nickel ternary alloy catalysts for the hydrogenation of carbon monoxide
T. Ishihara, K. Eguchi and H. Arai (Fukuoka, Japan) ..... 87

Reactant composition and concentration effects in the oxidation of methane on supported 12-molybdophosphoric acid
S. Ahmed and J.B. Moffat (Waterloo, Canada) ..... 101

Physical and catalytic properties of high-temperature water–gas shift catalysts based upon iron–chromium oxides
G. Doppler, A.X. Trautwein and H.M. Ziethen (Lübeck, F.R.G.), E. Ambach, R. Lehnert and M.J. Sprague (Ludwigshafen, F.R.G.) and U. Gonser (Saarbrücken, F.R.G.) ..... 119

Monitoring the surface states of a low-temperature carbon monoxide shift catalyst during operation
Z. Jovanović (Belgrad, Yugoslavia) and T. Marinova and P. Stefanov (Sofia, Bulgaria) ..... 131

New preparation technique for a highly dispersed nickel–alumina catalyst and its application to liquid phase hydrogenation
J.-I. Ishiyama, Y. Kurokawa, T. Nakayama and S. Imaizumi (Sendai, Japan) ..... 139

Reduction of titanium–antimony oxides in hydrogen and in carbon monoxide
F.J. Berry and P.M. Gogarty (Birmingham, U.K.) and J.W. Jenkins (Reading, U.K.) ..... 151

Studies of molybdena–alumina catalysts. XIV. Effect of cation-modified aluminas
A.R. Saini, B.G. Johnson and F.E. Massoth (Salt Lake City, UT, U.S.A.) ..... 157

Activation and performance of methanol synthesis catalysts derived from glassy copper/rare earth alloys
S.J. Bryan, J.R. Jennings, S.J. Kipling and G. Owen (Billingham, U.K.) and R.M. Lambert and R.M. Nix (Cambridge, U.K.) ..... 173

Aldol condensation of acetone/acetone $d_6$ over magnesium oxide and lanthanum oxide
G. Zhang, H. Hattori and K. Tanabe (Sapporo, Japan) ..... 183

Structure of monolayer type vanadium pentoxide, supported on γ-alumina
G Bergeret and P. Gallezot (Villeurbanne, France) and K.V.R. Chary, B. Rama Rao and V.S. Subrahmanyam (Hyderabad, India) ..... 191

Characterization of a promoted precipitated iron catalyst for Fischer–Tropsch synthesis
E.S. Lox, G.B. Marin and E. De Grave (Ghent, Belgium) and P. Bussière (Villeurbanne, France) ..... 197

Activity and stability of nickel–copper/silica catalysts prepared by deposition–precipitation
P.C.M. van Stiphout, D.E. Stobbe, F.Th.v.d. Scheur and J.W. Geus (Utrecht, The Netherlands) ..... 219

Effect of the precursor properties on the selectivity of iron based catalysts in the dehydrogenation of ethylbenzene to styrene
A. Mihajlova (Vratza, Bulgaria) and A. Andreev, D. Shopov and R. Dimitrova (Sofia, Bulgaria) ..... 247

Preparation of highly loaded vanadium oxide-silica catalysts
E.T.C. Vogt, M. de Boer, A.J. van Dillen and J.W. Geus (Utrecht, The Netherlands) ..... 254

Propene oligomerization over synthetic mica-montmorillonite (SMM) and SMM incorporating nickel, zinc and cobalt
C.T. O'Connor, L.L. Jacobs and M. Kojima (Rondebosch, South Africa) ..... 277

Influence of soluble aluminium on the state and surface properties of platinum in a series of reduced platinum/alumina catalysts
X. Huang, Y. Yang and J. Zhang (Beijing, Peoples Republic of China) ..... 291

*News Brief*
Novel chemical process technology ..... 316
V.N. Ipatieff Lecturership ..... 316
Synthesis of silicoaluminophosphate zeolite SAPO-34 ..... 316
Production of town gas from water gas ..... 317
Some new publications ..... 317
Petrotech 88 ..... 318

Shell Cyanamid ..... 318
4th Chinese conference on petrochemical catalysts ..... 318
Euchem conference on catalysis by zeolites ..... 320
European symposium on advanced materials ..... 320
Calendar of Forthcoming Events ..... 321
Book Review ..... 321
Tailpiece ..... 322

Author Index ..... 325
Subject Index ..... 328
Contents of recent issues of *Journal of Molecular Catalysis* ..... 334

In articles with more than one author, the name of the author to whom correspondence should be addressed is indicated in the article heading by a 6-pointed asterisk (*)
